RESULTS AND COMMERCIAL ACTIVITY

In the first half of 2021 BPI recorded a consolidated net profit of 185 M.€ (vs. 43 M.€ in the same period of 2020).

In the activity in Portugal, BPI's recurring net profit reached 89 M.€, which compares with 6 M.€ in the same period of last year, when significant impairment charges were booked to provide for potential impacts of the pandemic. **Net profit from the activity in Portugal matches pre-pandemic levels:** in the first half of 2019, BPI had posted a net profit of 87 M.€.

In the second quarter, BFA approved the 2020 ordinary dividend and a distribution of free reserves, with payment to shareholders in 3 instalments: 40% in September 2021, 30% in June 2022 and 30% in June 2023. BPI recognised 40 M.€ of the 2020 ordinary dividend in the income statement, and 79 M.€ of the distribution of reserves, of which 50 M.€ were taken to the income statement and 29 M.€ directly to reserves. The 119 M.€ will be recognised under Common Equity T1 (CET1) as they are received in Portugal.

The contribution of the holding in BFA to the consolidated net profit was thus 92 M.€ (which includes 40 M.€ from the 2020 dividend and 50 M.€ from the distribution of reserves taken to the income statement). The contribution of the holding in BCI was 9 M.€ in the first half of the year.

João Pedro Oliveira e Costa, BPI's CEO, highlights: *"In the 1st half of 2021, BPI continued to show strong commercial dynamics, driving the growth of net interest income and fee and commission income and, combined with strict cost control, the improvement of profitability. Recurring net income in the activity in Portugal has already reached pre-pandemic levels. As a penalising factor of the results, a total of 41.6 M.€ in regulatory costs was fully booked in the period. I should also stress that BPI is committed to supporting families and business and, with the "la Caixa" Foundation, to contributing to support social and development projects in the country to drive the desired recovery".*

REVENUES GROW, EFFICIENCY AND PROFITABILITY IMPROVE

Gross income grows by 11.5%

Gross income registered a significant increase of 11.5% yoy, driven by the strong performance of core income (+6.5% yoy) and the increase in gains on financial assets and liabilities.

Net interest income increased by 3.2% yoy, to 227 M.€, underpinned by credit volume growth and the contribution of Asset/Liability Management (ALCO), notwithstanding the narrowing of the intermediation margin and the challenges arising from the persisting context of negative market interest rates.

Net fee and commission income increased by 11% yoy, to 130 M.€, fuelled by the growth of mutual funds and capitalisation insurance volume, and of insurance intermediation, and also by the increase in bank fees and commissions on loans and accounts, which made up for the decrease in fees and commissions on payment means.

Cost of credit risk falls to zero

The Non performing Exposures ratio (NPE ratio, EBA criteria) improved from 1.7% in Dec.20 to 1.5% (-0.2 p.p.) at the end of the first half of the year. From January to June, the Non-Performing Loans ratio (NPL ratio, EBA criteria) dropped by 0.3 percentage points, to 1.8%. At the end of the first half of 2021 the coverage of NPLs by impairments and collaterals was 157%.
